

Town of Washington
Request for Proposal (RFP)
Detroit Harbor Boat Launch

The Town of Washington is seeking bids for the repairs and enhancements of its public boat launch facility located in Detroit Harbor. Our intent is to create a double launch facility vs. the current single launch ramp.

Project scope and details are as follows:

1. Remove concrete sidewalks and excavate approximately 350 cubic yards of dirt from the area south of the existing ramp area. Disposal of all materials shall be included in the proposal. Bidder shall grade area to match existing slope and approach and prep for concrete slabs.
2. Remove steel sheet piling from existing launch face and reinstall on south side of new dock face as needed for containment and retention – approximately 25 feet.
3. Install concrete embankments at start of ramp.
4. Install new interlocking, concrete slabs to embankment. Slabs shall be 18 feet by 5 feet by 6 inch thick and must have ½ inch re-rod on one (1) foot centers. Concrete must be at least 4000 psi rated.
5. All costs associated with a completed project are the responsibility of the bidder and costs of materials shall be included in the bid.
6. The qualified and selected bidder will be able to start project at such time that the Town of Washington receives all necessary permits from the Wisconsin DNR to commence with project.
7. Qualified bidder will provide to Town a copy of all insurance and certificate of bond of liability.
8. Best efforts will be made to keep existing launch facility operational during and while construction takes place.
9. Any comments can be directed to the Town Chairman at 920-883-6601 regarding questions pertaining to the project for clarification.

Please send sealed bid to the Town of Washington. Bids must be received by 12:00 noon on Monday, May 20th, 2013. Envelope shall be labeled: Launch Ramp. Mail to: Town of Washington, 910 Main Road, Washington Island, WI 54246.
