

Town Informational Meeting

June 22nd, 9 AM 2012

Rutledge Room,
Community Center

On Friday, June 22nd at 9 am in the Rutledge Room at the Community Center, there will be a gathering of membership representing the Wisconsin DOT, Wisconsin Coastal Management Program, UW Sea Grant, US Army Corp of Engineers, Wisconsin Economic Development Corporation, FOTH Engineering, Town of Washington, Washington Island Ferry Line, Wisconsin DNR and possibly others.

The purpose of this “round table” is to clear the air on the application of Town’s Dredging project application, its current status of denial, and its hope for the future submittal in early 2013.

FOTH Engineering will be basically facilitating the conversation with all parties as to determine the steps to follow next to make a deadline for an application re-submittal by the Town of Washington. A format and conversational outline will be handed out at the table of discussion.

This is an open conversation and public are welcome to listen in.

More than 2 Town Board members may be present, but there is no official action to be taken. This is informational and for discussion purposes only.

Joel Gunnlaugsson
Town Chairman
