

Request for Proposal (RFP)

Town of Washington

Posted May 23rd, 2013

The Town of Washington has modified our efforts to repair and construct a new boat launching facility in Detroit Harbor. We have decided that our Town Crew will be doing the work, but the Town will need to hire out machinery to do some of the work.

All work is based on rules and regulations as set by the WisDNR. Our Permit Application is pending and once we get approval, we will commence with the project.

The Town Board at it's regular board meeting on May 21st, 2013 has decided to solicit proposals for equipment rental by owner use to do the excavating and loading of roughly 350 cubic yards of materials into Town dump trucks, remove about 60 feet of steel sheet piling and create finish grade of materials to provide required angle for the construction of the ramp. Also, assist if needed in any aspects of construction and moving of materials for the boat ramp project as required.

We request that any contractor able and willing to do this work submit a proposal including equipment hourly rate for doing above said work. The requested rate shall be a total hourly rate including the operator and equipment.

Billable time will be based on the hours of use of the equipment.

Please send your equipment hourly rate proposal to the Town of Washington by the end of the business day, May 31st, 2013.

Please call 920-883-6601 for any questions regarding this request and scope of project.

Contractor / Business Name: _____

Proposed hourly rate of equipment (including operator): _____
